## DETAILED ACTION

### *Claim Objections*

Claims 39-72, 77 and 79 are objected to because of the following informalities:

Claim 39 has an extraneous period on line 17.

Appropriate correction is required.

### *Double Patenting*

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ...". (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Art Unit: 2872

Claims 1-81 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-100 of U.S. Patent No. 6,621,632 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because the newly presented claims correspond to the patented claims with the emphasis on the subject matter of claim 15, i.e. the feature of providing a second input signal which is separated into a third beam and a fourth beam.
